Safety Procedures

Safety is of the upmost priority for our team to ensure your AXEperience is a positive one. Axe throwing is a very safe and enjoyable sport if you follow our rules as well as utilize common sense to be safe throwers!

- Every thrower must review the following document and go through safety training with an axe coach before throwing.
- Before throwing, each thrower must sign a Waiver of Liability stating they understand rules, etiquette, and precautions of CRAXE.
- We have a limit of 6 people per bay.
- All throwers are REQUIRED to wear closed-toe shoes.
- Stating the obvious, but we all know axes/ninja stars/knives are SHARP. Handle these throwable items with that in mind.
- Only one throwable can be thrown per time and can not be thrown while another throwing item is in the board.
- You are permitted to only use the throwables provided by CRAXE unless given permission from management.
- Throwables are not permitted behind the axe tables.
- The only throws that are permitted are the throws taught by the axe coaches: two handed, one handed, and underhand.
- Do not attempt to "yank" the axe out of the board... Wiggle the axe up and down until it is free.
- Do not attempt to pull a ninja star free if deeply engrained in the wood. Grab an axe and slowly hammer it out until free. ****Ninja stars are the easiest weapons to injure throwers****
- Absolutely no destructive/aggressive throwing permitted... We promise, you don't need to throw a fastball to get a throwable to stick.
- The no bounce borders aligning the target are there to greatly reduce the potential of a bounce back if the throwable does not hit the wood target.
- Our staff continually monitors your group throughout your AXEperience to answer any questions and to ensure safety measures are being followed.
